DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/24/2009 has been entered.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Brenda O. Holmes, Esq. on 2/8/2010.

The application has been amended as follows:

Claim 9, line 1, replace the phrase "A computer readable medium..." with the phrase "A non-transitory computer readable medium...".

Allowable Subject Matter

Claims 1-3, 5-6, 8-9, and 13-16 are allowed.

The following is an examiner's statement of reasons for allowance:

With regards to independent claims 1, 8, 9 and 13, while the cited prior art does teach separately determining the aboveground openness about a focused point at a local region of a plane by a region at an obverse side of the plane residing within a prescribed radius as an elevation degree of the local region and determining the belowground openness about the focused point at the local region of the p[lane by a region at a reverse side of the plane residing within the prescribed region from the focused point as a depression degree of the local region, see the Yokoyama references entitled , "TOPOGRAPHICAL FEATURE REPRESENTATION BY OPENNESS MAPS", cited in the PTO-892 form mailed on 11/24/2008, and "Visualizing Topography by Openness: A New Application of Image Processing to Digital Elevation Models", provided with the IDS form filed by Applicant on 12/22/2005, cited prior art does not teach synthesizing the elevation degree and the depression degree in a weighting manner to determine the degree of openness about the focused point at the local region of the plane by the combination of the region at the obverse side and the region at the reverser side of the plane residing within the prescribed radius from the focused point as an elevation-depression degree at the local region and then mapping the three-dimensional coordinate space on the two-dimensional plane and providing a tone indication commensurate with the elevation-depression degree as now claimed.

Art Unit: 2628

Claims 2-3, 5-6 and 14-16 depend from independent claims 1 and 13 and are allowed for the reasons cited above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to ROBERTA PRENDERGAST whose telephone number is (571)272-7647. The examiner can normally be reached on M-F 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ulka Chauhan can be reached on (571) 272-7782. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
